DETAILED ACTION

Claim Objections

1. Claims 8-13 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from any other multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims have not been further treated on the merits.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. A broad range or limitation together with a narrow range or limitation that falls within the broad range or limitation (in the same claim) is considered indefinite, since the resulting claim does not clearly set forth the metes and bounds of the patent protection desired. Note the explanation given by the Board of Patent Appeals and Interferences in *Ex parte Wu*, 10 USPQ2d 2031, 2033 (Bd. Pat. App. & Inter. 1989), as to where broad language is followed by "such as" and then narrow language. The Board stated that this can render a claim indefinite by raising a question or doubt as to whether the feature introduced by such language is (a) merely exemplary of the remainder of the claim, and therefore not required, or (b) a required feature of the claims. Note also, for example, the decisions of *Ex parte Steigewald*, 131 USPQ 74 (Bd. App. 1961); *Ex parte Hall*, 83 USPQ 38 (Bd. App. 1948); and *Ex parte Hasche*, 86 USPQ 481 (Bd. App. 1949). In the present instance, claims 2, 3, 5 and 7 recite a broad recitation, and the claim also recites "preferably. . ." which is the narrower statement of the range/limitation.

Art Unit: 1743

4. Regarding claim 7, the phrase "such as" renders the claim indefinite because it is unclear whether the limitations following the phrase are part of the claimed invention. See MPEP § 2173.05(d).

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1-7 are rejected under 35 U.S.C. 102(b) as being anticipated by USP 5,500,138 to Bacon et al. (herein referred to as "Bacon").

Bacon teaches at col. 28, lines 1-12, a five-equal-parts, five-component composition designated "perfume A" wherein the four components listed first have a boiling point under atmospheric pressure higher than 275 degrees C and a value ClogP higher than 4.0, the composition thus satisfying condition b) in present claim 1. In perfume A, the fifth component is present in a proportion of 20%, has a bp of 191 degrees C and a ClogP of 3.517, thus satisfying condition a) in present claim 1. The reference is silent as to the value of any odor detection threshold which may be associated with and determined for the respective component groups a) and b) as identified herein. However, it would apparently suffice for perfume A, component b) to satisfy this criteria that only one component within perfume A have a very low odor detection threshold value. Such low values are common in the perfume art. It is the Examiner's position that the composition of Bacon does have an odor detection threshold less than 50. With regard

to the encapsulation of the composition, Bacon recognizes this as a conventional perfume art delivery method (col. 1, lines 40-42).
